EXPERIENCE

CODING BLOCKS | FULL STACK WEB DEVELOPER

12 June 2024- 28 July 2024 | Delhi, India

- Developed a quiz game website using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Implemented user authentication, real-time score updates, and an interactive UI for a seamless gaming experience.
- Optimized database queries to enhance performance and scalability.
- Gained hands-on experience in REST API development, frontend state management, and deployment.

PROJECTS

FACE MASK DETECTION SYSTEM | PYTHON

2024

- Developed a real-time face mask detection system using Deep Learning and OpenCV..
- Trained a convolutional neural network (CNN) model to classify images as masked or unmasked with high accuracy.
- Integrated the model with a webcam feed for live detection and alerts.
- Utilized TensorFlow, Keras, OpenCV, and Python for model training and deployment.

QUIZIFY | MERN STACK

2024

- Developed a quiz game application using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Implemented user authentication, real-time score tracking, and dynamic quiz generation.
- Designed an interactive UI/UX for a seamless and engaging user experience. Optimized backend performance with efficient database queries and RESTful APIs. Deployed the application for scalability and real-world usage.

GOVERNMENT DOCUMENT RETRIEVAL SYSTEM | PYTHON/FLASK

2025

- Developed an automated document scraping system using Python and BeautifulSoup for efficient government document retrieval and classification
- Implemented intelligent document filtering to distinguish between citizen-relevant and technical documents, enhancing information accessibility
- Engineered robust error handling and retry mechanisms for reliable document downloads and system stability
- Optimized system performance through efficient request handling and intelligent caching mechanisms

LOCATION-BASED ALARMAPP | REACTNATIVE/TYPESCRIPT

2025

- Developed a React Native and TypeScript mobile application for setting location-based alarms.
- Integrated GPS and geofencing to trigger alarms only when the user enters a specified location.
- Implemented an intuitive UI/UX for seamless alarm scheduling and location selection.
- Implemented real-time location tracking with optimized background services for efficient battery usage.

CERTIFICATIONS

- AI for Everyone from coursera
- Deloitte Technology Job Simulation

SKILLS

PROGRAMMING

Proficient:

C++ • JavaScript • Python
SQL • CSS • HTML • Python

Experienced:

React Native • TypeScript

LIBRARIES/Frameworks

jQuery • Node.js • React

TOOLS/PLATFORMS

Git • AI Tools • Cursor •

EDUCATION

BML MUNJAL UNIVERSITY

B-TECH IN COMPUTER SCIENCE

Jan 2022 - Present | Gurgaon, Haryana

INTEREST/HOBBIES

- Chess
- Gaming
- Cricket
